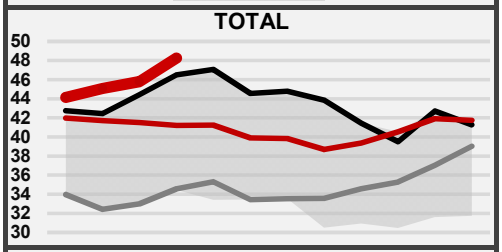
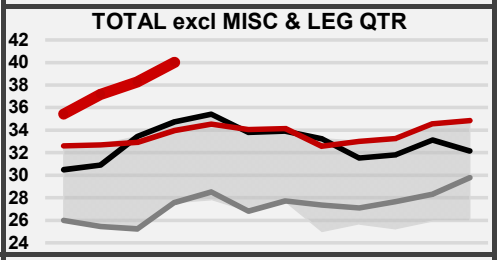
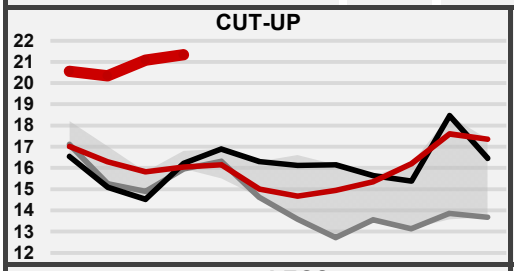
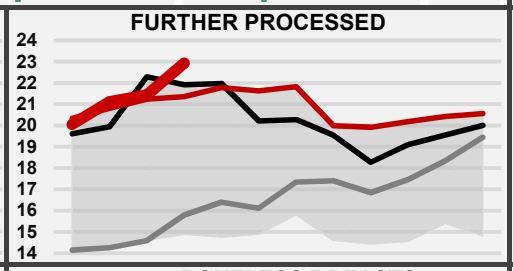
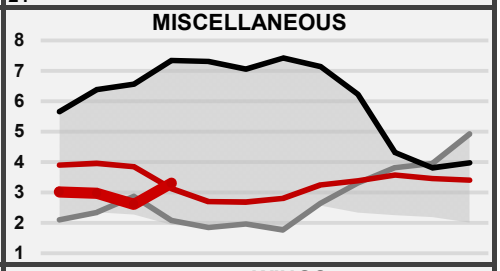
2015 2016 2017 2018
5-year range

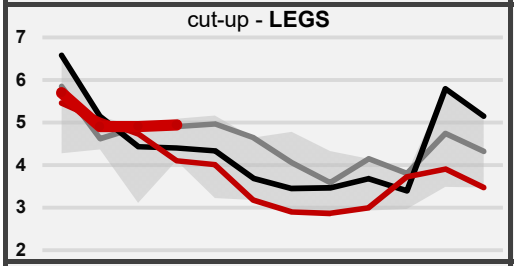


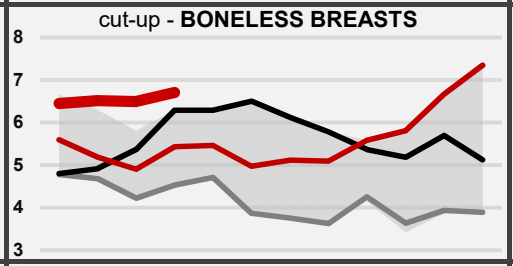


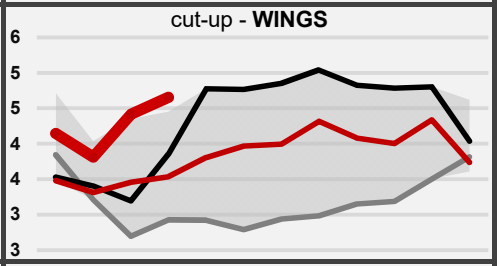


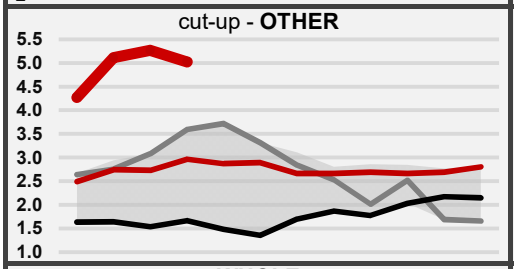


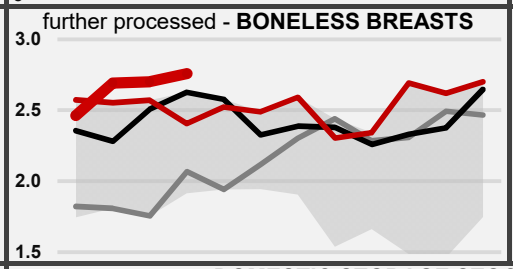


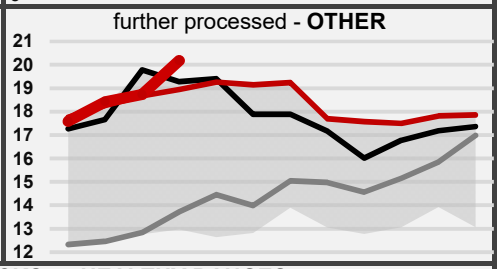


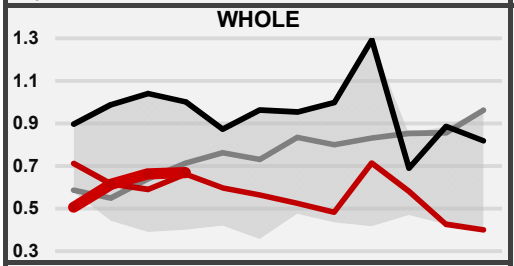


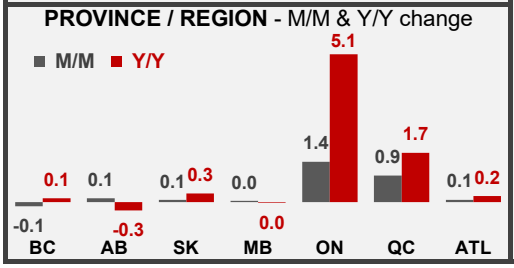


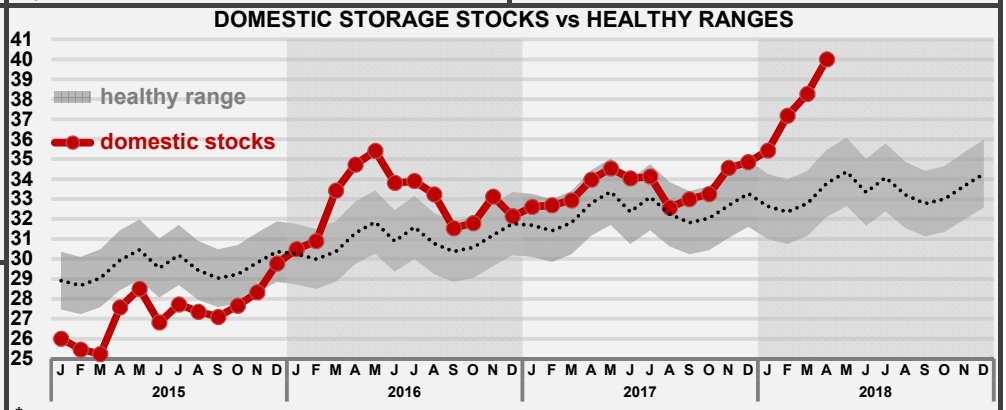












* Annual **target values** for domestic stocks are calculated using the ratio between annual domestic production and average yearly domestic stocks, using the most recent seven years of data. Monthly stock seasonality factors, also calculated using the most recent seven years (2011-2017) of data, are then applied to the annual target to calculate the monthly targets. **Healthy Ranges** are set 5% above and below the monthly target.
